14	Wu Ming	125 Sterling Price Street	Tatum	Texas	75691-0809

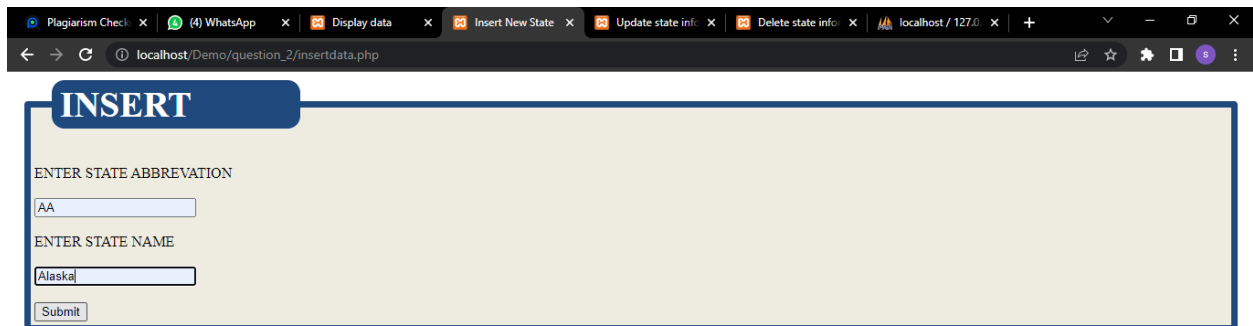

Q2. Insert a new state 'Alaska', 'AA' in the art gallery database using the web interface you created.

phpMyAdmin interface showing the 'state' table in the 'artgalleryproject' database. The table contains 6 rows of state data. The 'state' table structure is visible, showing columns STATEAB and STATENAME. The 'state' table is selected, and the 'Insert' tab is active.

STATEAB	STATENAME
CA	California
KS	Kansas
LA	Louisiana
NM	New Mexico
OK	Oklahoma
TX	Texas

INSERT

ENTER STATE ABBREVIATION

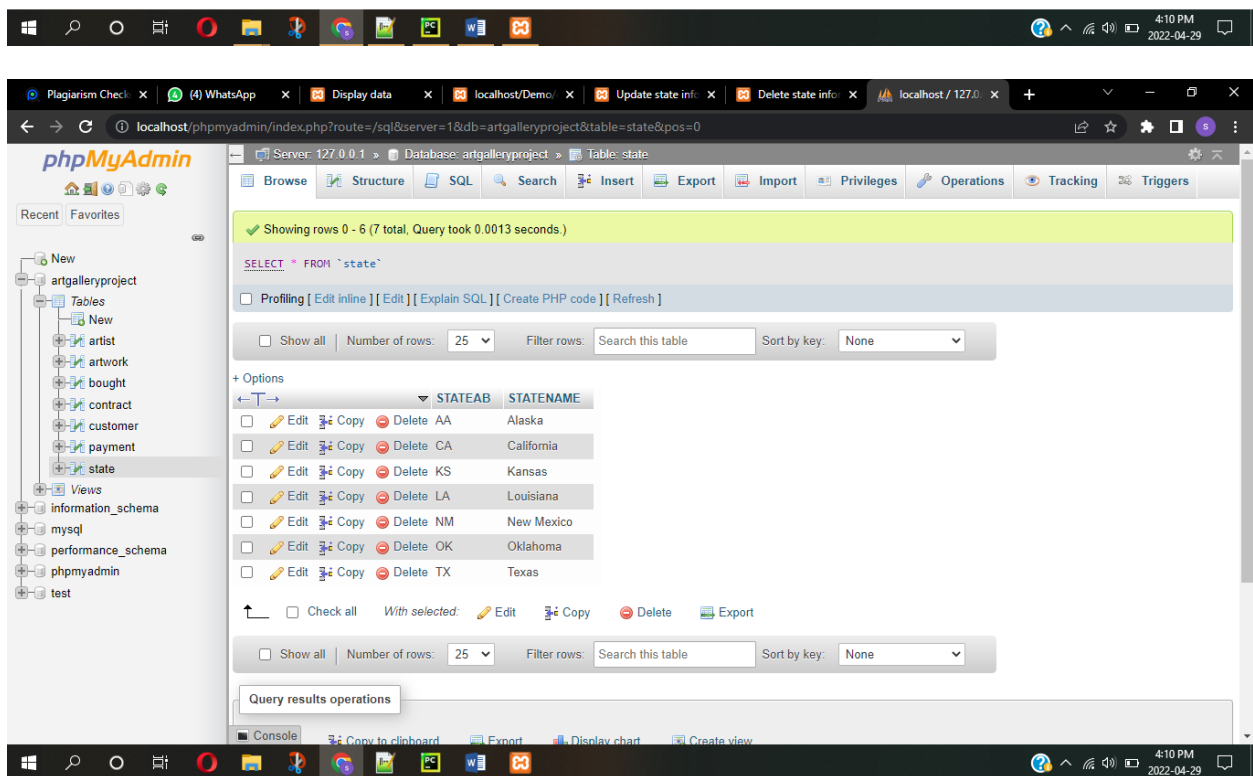

AA

ENTER STATE NAME

Alaska

Submit

Shubham Malankar

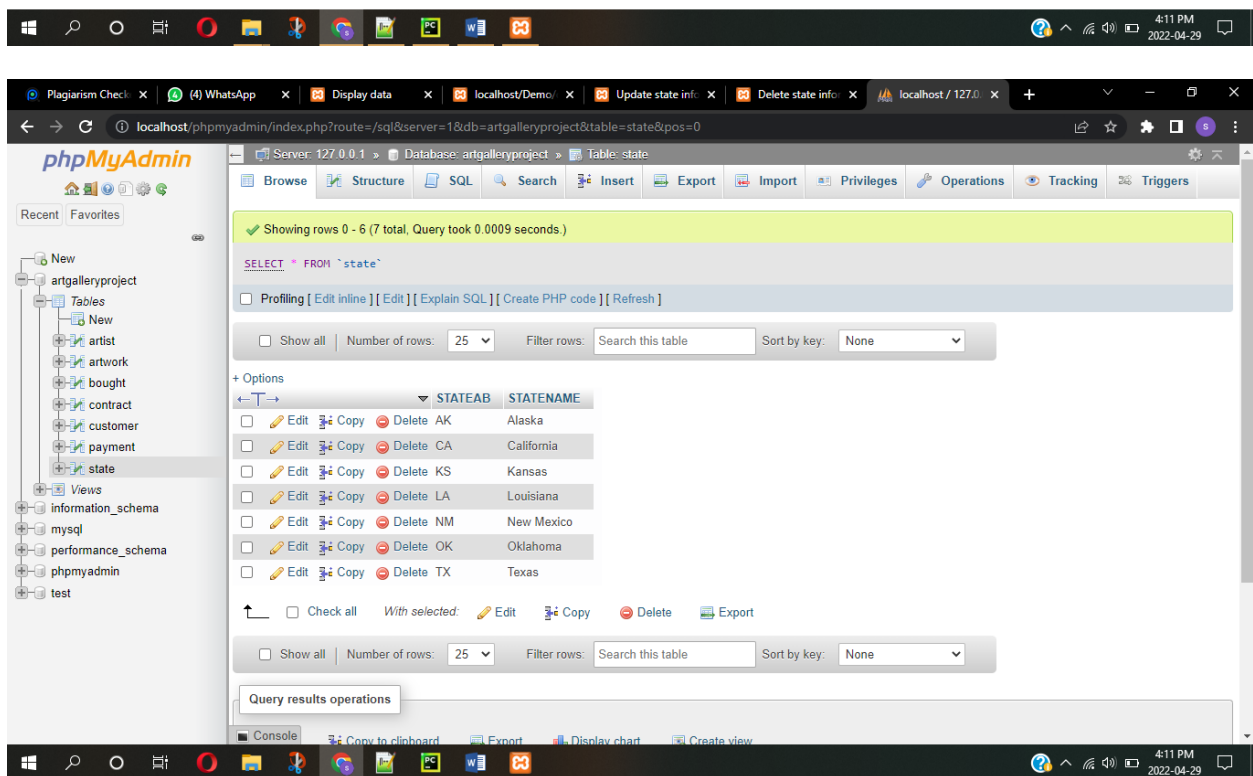

Q3. Update the state record that you just added to 'Alaska', 'AK' using the web interface you created.

The screenshot shows the phpMyAdmin web interface. The left sidebar displays the database structure for 'artgalleryproject', including tables like 'artist', 'artwork', 'bought', 'contract', 'customer', 'payment', and 'state'. The main panel shows the 'state' table with 7 rows of data. The table has columns 'STATEAB' and 'STATENAME'. The rows are: AA (Alaska), CA (California), KS (Kansas), LA (Louisiana), NM (New Mexico), OK (Oklahoma), and TX (Texas). The 'UPDATE' button in the 'Query results operations' bar is highlighted.

STATEAB	STATENAME
AA	Alaska
CA	California
KS	Kansas
LA	Louisiana
NM	New Mexico
OK	Oklahoma
TX	Texas

The screenshot shows the web application interface for updating a state record. The form has a title 'UPDATE' and a message 'Please enter STATE NAME whose STATE ABBREVIATION you want to change'. It includes input fields for 'State Abbreviation' (AK) and 'State Name' (Alaska), and an 'UPDATE' button.

The screenshot shows the Windows taskbar at the bottom of the screen. The system clock displays 4:11 PM on 2022-04-29.

Q4. Delete the state of Alaska record that you just added using the web interface you created.

phpMyAdmin interface showing the 'state' table in the 'artgalleryproject' database. The table contains 7 rows of state data. The 'DELETE DATA' tab is active, and the 'Delete' button is highlighted in the query results operations bar.

STATEAB	STATENAME
AK	Alaska
CA	California
KS	Kansas
LA	Louisiana
NM	New Mexico
OK	Oklahoma
TX	Texas

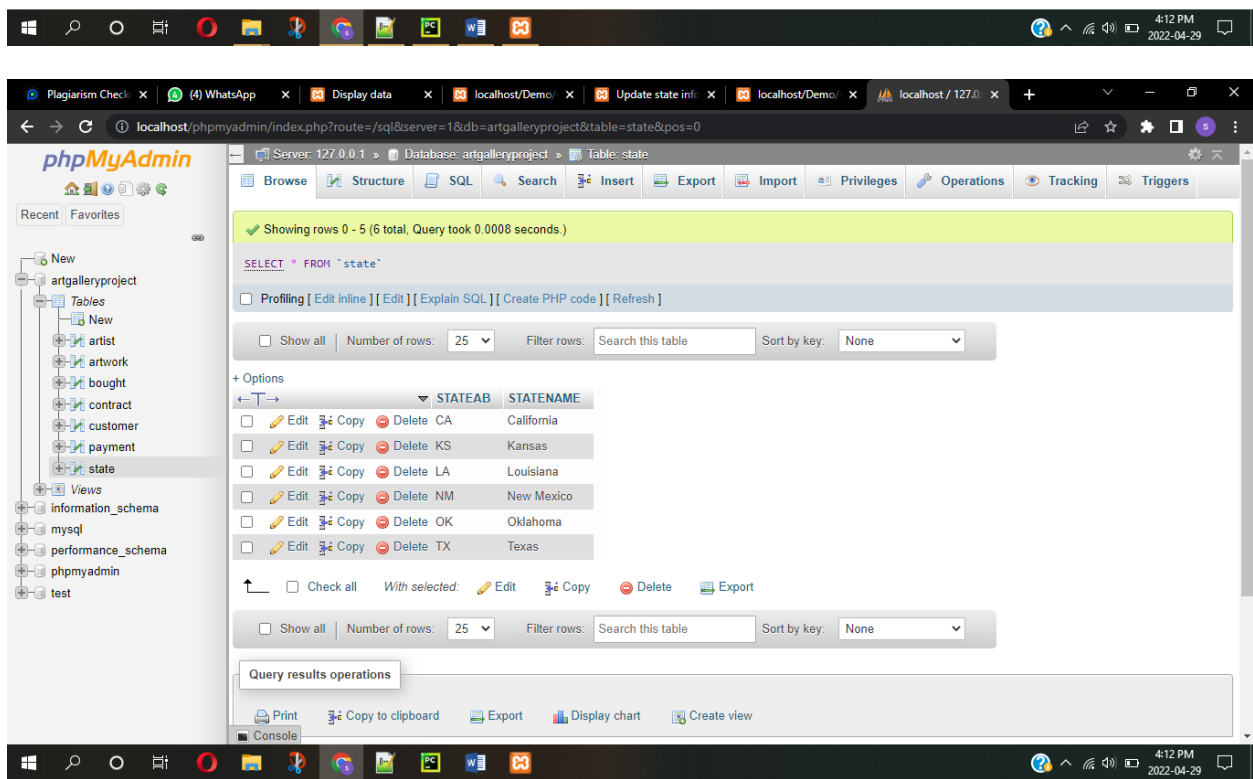

DELETE

Please Enter Statename

State Name:

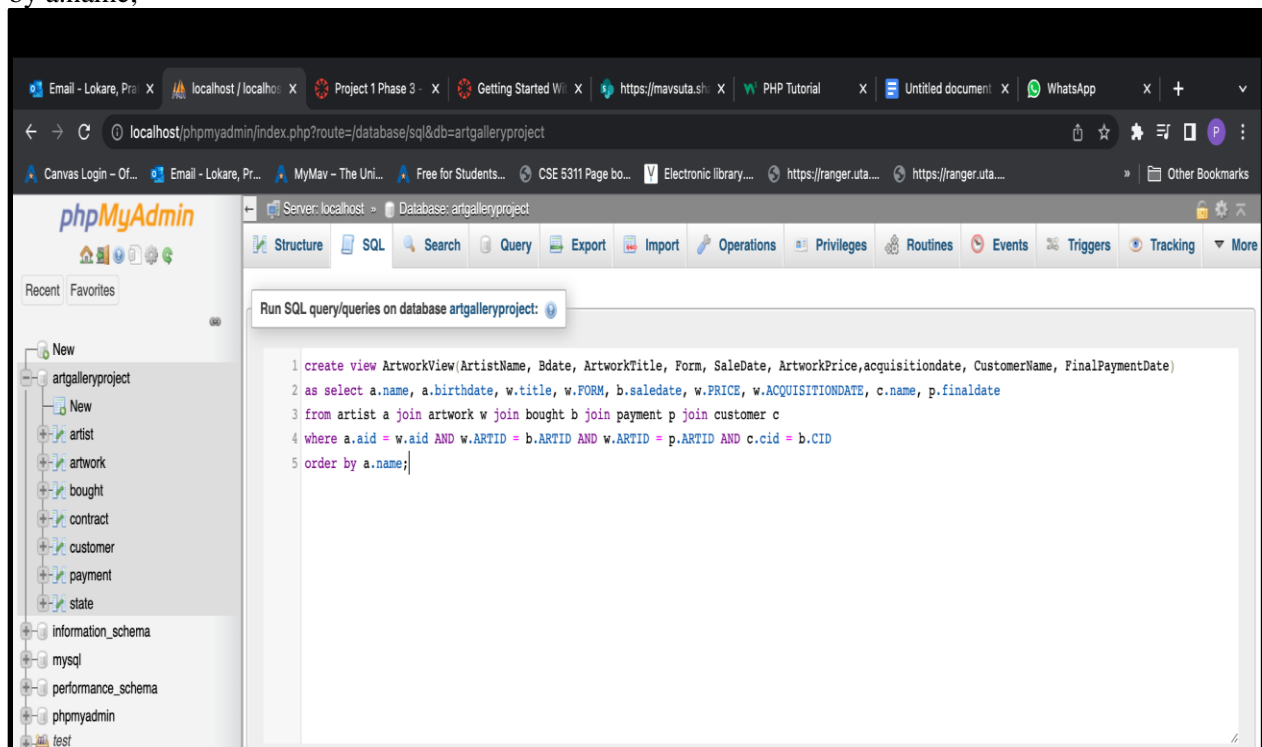

Task View

Shubham Malankar

QV1 Create a view ArtworkView that shows name of artist as ArtistName, his date of birth as Bdate, title of the artwork as ArtworkTitle, the form of artwork as Form, the sale date as SaleDate, the price as ArtworkPrice, the customer's name who bought the artwork as CustomerName, final date of the payment as FinalPaymentDate, and the acquisition date of that artwork as AcquisitionDate. Records should be sorted by the name of the artist.

Query - create view ArtworkView(ArtistName, Bdate, ArtworkTitle, Form, SaleDate, ArtworkPrice, acquisitiondate, CustomerName, FinalPaymentDate) as
select a.name, a.birthdate, w.title, w.FORM, b.saledate, w.PRICE, w.ACQUISITIONDATE, c.name, p.finaldate from artist a join artwork w join bought b join payment p join customer c
where a.aid = w.aid AND w.ARTID = b.ARTID AND w.ARTID = p.ARTID AND c.cid = b.CID order
by a.name;

ArtistName	Bdate	ArtworkTitle	Form	SaleDate	ArtworkPrice	acquisitiondate	CustomerName	FinalPaymentDate
Abed Abdi	2000-01-01	Refugee Camp	painting	2021-07-08	12000.00	2021-02-07	Mahbod Seraji	2021-07-08

QV2. Use the view ArtworkView to retrieve a list of unique names of the artists and their customers when both the names start with vowels.

Query - `SELECT distinct ArtistName, CustomerName FROM `artworkview` WHERE (`ArtistName` LIKE 'A%' or `ArtistName` LIKE 'E%' or `ArtistName` LIKE 'I%' or `ArtistName` LIKE 'O%' or `ArtistName` LIKE 'U%') and (`CustomerName` LIKE 'A%' or `CustomerName` LIKE 'E%' or `CustomerName` LIKE 'I%' or `CustomerName` LIKE 'O%' or `CustomerName` LIKE 'U%')`

Current selection does not contain a unique column. Grid edit, checkbox, Edit, Copy and Delete features are not available.

Showing rows 0 - 1 (2 total, Query took 0.0102 seconds.)

```
SELECT distinct ArtistName, CustomerName FROM `artworkview` WHERE (`ArtistName` LIKE 'A%' or `ArtistName` LIKE 'E%' or `ArtistName` LIKE 'I%' or `ArtistName` LIKE 'O%' or `ArtistName` LIKE 'U%') and (`CustomerName` LIKE 'A%' or `CustomerName` LIKE 'E%' or `CustomerName` LIKE 'I%' or `CustomerName` LIKE 'O%' or `CustomerName` LIKE 'U%');
```

Profiling [Edit inline] [Edit] [Explain SQL] [Create PHP code] [Refresh]

Show all | Number of rows: 25 | Filter rows: Search this table

ArtistName	CustomerName
Albert Bierstadt	Anil Desai
Edward Hopper	Amitav Ghosh

QV3 Use the view **ArtworkView** to retrieve a list of unique names of the artists whose artwork form is painting.

Query - `SELECT distinct ArtistName FROM `artworkview` WHERE form = 'painting'`

The screenshot shows the phpMyAdmin interface with the 'artworkview' table selected. The SQL query `SELECT distinct ArtistName FROM `artworkview` WHERE form = 'painting';` has been executed, resulting in 6 rows of data. The results are displayed in a table with the following data:

ArtistName
Abed Abdi
Edward Hopper
Georgia O'Keeffe
Jasper Johns
Li Chen
Nandalal Bose

QV4 Use the view **ArtworkView** to retrieve a list of unique names of the artists, artwork title, and the price when the price is greater than \$250.00 and less than \$15,000.00

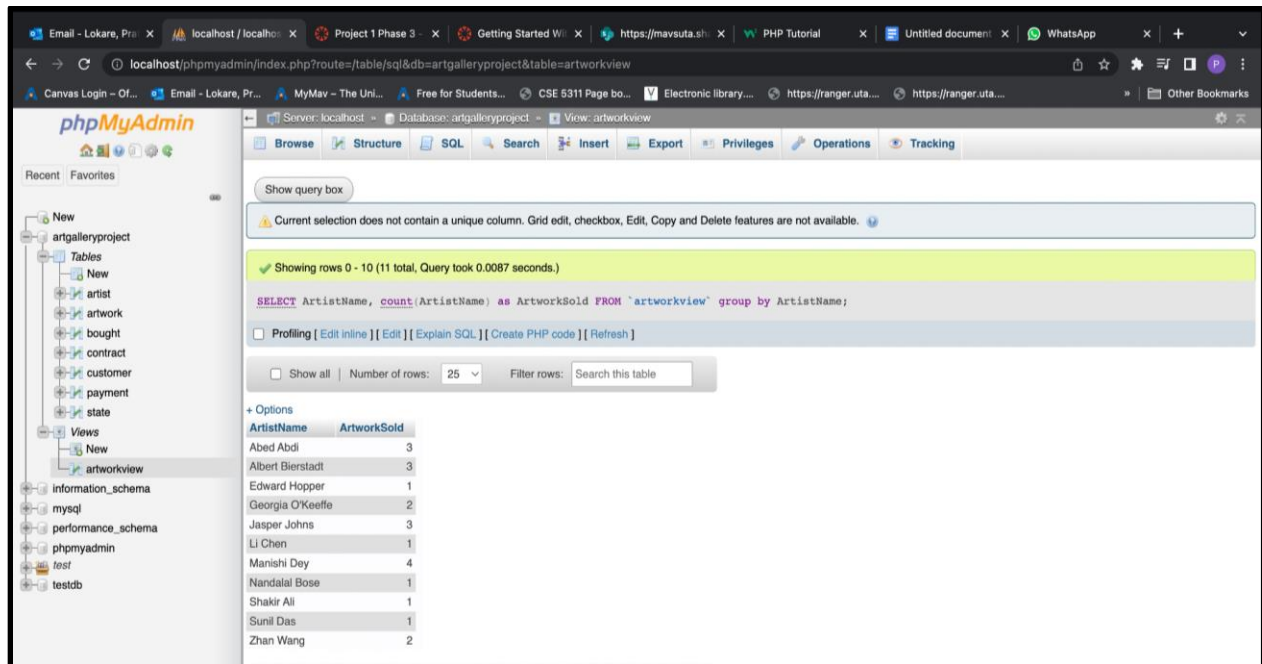

Query - `SELECT distinct ArtistName, ArtworkTitle, ArtworkPrice FROM `artworkview` WHERE ArtworkPrice > 250 and ArtworkPrice < 15000`

The screenshot shows the phpMyAdmin interface with the 'artworkview' table selected. The SQL query `SELECT distinct ArtistName, ArtworkTitle, ArtworkPrice FROM `artworkview` WHERE ArtworkPrice > 250 and ArtworkPrice < 15000;` has been executed, resulting in 7 rows of data. The results are displayed in a table with the following data:

ArtistName	ArtworkTitle	ArtworkPrice
Abed Abdi	Refugee Camp	12000.00
Abed Abdi	Palestinian Women	1700.00
Edward Hopper	Morning Sun	12000.00
Georgia O'Keeffe	Leaf Motif	350.00
Jasper Johns	Three Flags	11500.00
Nandalal Bose	Singawala	10000.00
Zhan Wang	Mirror Garden	10000.00

QV5 Use the view ArtworkView to list the names of the artists and the total number of their art pieces sold so far at the gallery.

Query - SELECT ArtistName, count(ArtistName) as ArtworkSold FROM `artworkview` group by ArtistName

The screenshot shows the phpMyAdmin interface with the 'artgalleryproject' database selected. The 'artworkview' view is chosen from the left sidebar. The SQL query is entered in the 'SQL' tab and executed. The results are displayed in a table with two columns: 'ArtistName' and 'ArtworkSold'.

ArtistName	ArtworkSold
Abed Abdi	3
Albert Bierstadt	3
Edward Hopper	1
Georgia O'Keeffe	2
Jasper Johns	3
Li Chen	1
Manishi Dey	4
Nandalal Bose	1
Shakir Ali	1
Sunil Das	1
Zhan Wang	2

QV6 For all the artwork that were acquired on 9th September 1995 (1995-09-12), retrieve the name of the artist, his/her date of birth, the title of their artwork, sale date, customer name, and final payment date.

Query - SELECT artist.NAME AS ArtistName, artist.BIRTHDATE AS Bdate, artwork.TITLE AS ArtworkTitle, artwork.ACQUISITIONDATE AS acquisitionDate, bought.SALEDATE, customer.name AS CustomerName, payment.FINALDATE AS FinalPaymentDate FROM artist LEFT JOIN artwork ON artist.AID = artwork.AID LEFT JOIN bought ON artwork.ARTID = bought.ARTID LEFT JOIN payment ON artwork.ARTID = payment.ARTID LEFT OUTER JOIN customer ON customer.CID = bought.CID WHERE artwork.ACQUISITIONDATE = '1995-09-12';

The screenshot shows the phpMyAdmin interface for a database named 'artgalleryproject'. The 'Tables' section on the left lists 'artist', 'artwork', 'bought', 'contract', 'customer', 'payment', and 'state'. The 'Views' section lists 'artworkview'. The 'Tables' section is selected, and the 'artist' table is highlighted. The 'SQL' tab is active, displaying a complex query that joins multiple tables: 'artist', 'artwork', 'bought', 'customer', and 'payment'. The query uses multiple LEFT JOINs to retrieve data from these tables. The results are displayed in a table with 7 columns: 'ArtistName', 'Bdate', 'ArtworkTitle', 'acquisitionDate', 'SALEDATE', 'CustomerName', and 'FinalPaymentDate'. The results show 12 rows of data, including artists like Albert Bierstadt and Mount Hood.

Showing rows 0 - 11 (12 total, Query took 0.0040 seconds.)

```
SELECT artist.NAME AS ArtistName, artist.BIRTHDATE AS Bdate, artwork.TITLE AS ArtworkTitle, artwork.ACQUISITIONDATE AS acquisitionDate, bought.SALEDATE, customer.name AS CustomerName, payment.FINALDATE AS FinalPaymentDate FROM artist LEFT JOIN artwork ON artist.AID = artwork.AID LEFT JOIN bought ON artwork.ARTID = bought.ARTID LEFT JOIN payment ON artwork.ARTID = payment.ARTID LEFT OUTER JOIN customer ON customer.CID = bought.CID WHERE artwork.ACQUISITIONDATE = '1995-09-12';
```
